TECHNICAL SKILLS

PROGRAMMING LANGUAGES

Python | JavaScript | PHP | Java

BACKEND & APIS

FastAPI | Node.js | CodeIgniter 4 | Laravel 12

FRONTEND

React | Next.js | HTML | CSS | Responsive UI

DATABASE

MySQL | SQLite | SQLAlchemy

AI & OCR

Claude AI | ChatGPT | Gemini API | Surya OCR | Tesseract | Qwen 8B | Grok 4.6

APIS USED

Gemini Free API | SendGrid | ScrapingDog | Social Media API | OpenRouter Image API

CMS & PLATFORMS

WordPress | Shopify

TOOLS

Git | Postman | Android Studio | Canva | Ideogram | MS Office | Cursor | Cursor Agent | TablePlus

SPOKEN LANGUAGES

English — Professional

Hindi — Native

PROFESSIONAL SUMMARY

Software Developer with 1+ year of hands-on experience in backend and full-stack web development, building production applications and client-facing solutions. Currently working as a Backend Developer Intern at InstaWeb Pvt. Ltd. (websites.co.in), developing features and REST APIs using Laravel 12, Next.js, and MySQL, with experience in domain management, social media automation, WhatsApp integrations, and customer support systems. Previously worked at Ikshvaku Solutions Pvt. Ltd., where I developed FastAPI and CodeIgniter 4 applications, deployed 7+ production websites using WordPress and Shopify, and built AI/OCR-based solutions for document processing, audit compliance, and government portal automation. Experienced in third-party API integration, database management, backend automation, AI-powered applications, and end-to-end feature development.

WORK EXPERIENCE

Backend Developer Intern

March 2026 – Present

InstaWeb Pvt. Ltd.

- Working as a Backend Developer Intern for 6 months, building features for websites.co.in using PHP (Laravel 12), REST APIs, and engaging front-end UI for users
- Developing REST APIs and testing them with Postman; building dashboard components with Next.js
- Managing MySQL databases using TablePlus for full-stack feature development
- Working on domain-related functionality, the Customer Support Dashboard, and Support Bot
- Building social media configuration features that power multiple connected client features

Software Developer Intern

March 2024 – March 2026

Ikshvaku Solutions Pvt. Ltd.

- Designed and deployed 7+ production websites for clients across gaming, trade, wellness, jewellery, and design industries using WordPress and Shopify
- Built REST APIs in FastAPI and developed backend modules in PHP (CodeIgniter 4); managed databases using SQLite, SQLAlchemy, and MySQL
- Researched and integrated OCR models (Surya OCR, Tesseract, Qwen 8B Instruct) to extract text from handwritten forms and scanned documents
- Automated CAPTCHA text capture using OCR on secured government portals (IIB Envoy, IRDAI Agency Portal) for backend integration
- Built audit compliance tool where users upload a PDF and query it — Gemini API and Sentence Transformers return answers with page numbers and extracted phrases
- Integrated Gemini Free API, SendGrid (email), and ScrapingDog API in live intern projects
- Used Claude AI, ChatGPT, and Gemini to generate code, build AI-powered features, and create images via Ideogram

PROJECTS

INSTAWEB PVT. LTD. — WEBSITES.CO.IN

Website Audit — Dashboard Analysis Feature — INTERNSHIP PROJECT

Built a website audit feature that analyses a user's full dashboard and website across three tabs: **Issues Detected** (issues found during the latest audit scan), **Good To Have** (optional improvements to push the website further), and **Fix Issues With Our Services** (services to grow the client's online presence).

Laravel 12 | MySQL | Next.js | REST API

Festival Offer — Admin-Managed Promotions — INTERNSHIP PROJECT

Built an admin-side feature to create festival-based offers and sales showcased to all clients connected with websites.co.in, giving them discounts to upgrade their plan; includes a dedicated admin dashboard to create and manage festival offers.

Laravel 12 | MySQL | Admin Dashboard

Social Media Post — Multi-Platform Publishing — INTERNSHIP PROJECT

Built a feature letting users create a post with content and an optional caption and publish it directly to connected accounts on X, LinkedIn, Pinterest, Facebook, and Instagram, with a live preview of how the post will look, with or without an image. Also supports posting product details (name, price, description, stock) and includes Social Media Configuration, removing the need to post separately on each platform.

Laravel 12 | Social Media APIs | Next.js

AI Auto Post — Scheduled Content Generation

INTERNSHIP PROJECT

An advanced version of Social Media Post that generates 1–10 unique posts per business using AI, based on business details and user instructions. Users can draft or schedule posts; a scheduled job auto-publishes them at the set date/time, with a calendar view, editable social captions, and a live preview of the final content.

Laravel 12 · Python · AI Prompting · Job Scheduling

Domain Management — Search, Buy & Manage

INTERNSHIP PROJECT

Built a shopping-cart-style domain feature to search and purchase domains with or without extensions, integrated with Cloudflare. Includes a domain management dashboard for transfer, redirect, nameserver updates, DNS records, and renewals, plus one-click primary domain setup after email confirmation.

Laravel 12 · Cloudflare · DNS · MySQL

WhatsApp Message — Automated Notifications

INTERNSHIP PROJECT

Built using Laravel and Next.js to send automated WhatsApp messages (alongside existing email notifications) for subscription purchases, renewals, and plan/trial expiry, supported across 16 countries, with an admin dashboard for WhatsApp Configuration and message management.

Laravel · Next.js · WhatsApp API

SOFTWARE & FULL-STACK — IKSHVAKU SOLUTIONS

Audit Compliance — PDF Q&A Tool

INTERNSHIP PROJECT

Users upload a PDF and ask questions; Gemini API and Sentence Transformers return accurate answers with the exact page number and extracted phrase. Containerised with Docker.

Python · FastAPI · Gemini API · Sentence Transformers · Docker

OCR Data Extraction — Handwritten Forms & Govt Portals

envoy.iib.gov.in · irdai.gov.in

Applied Surya OCR, Tesseract, and Qwen 8B Instruct to extract text from handwritten forms. Separately automated CAPTCHA reading on two government portals for backend data integration.

Python · Surya OCR · Tesseract · Qwen 8B · ScrapingDog API

SprintCart — E-Commerce Platform

LOCAL PROJECT

Full-stack e-commerce app with product listing, cart, and checkout. Built scalable FastAPI backend with SQLAlchemy ORM and React frontend.

FastAPI · React · SQLAlchemy · MySQL

Care4Skin — AI Skincare Recommendation App

ACADEMIC PROJECT

Skincare recommendation system using Gemini API for AI-driven suggestions based on user skin type input. Includes SendGrid email integration.

Python · FastAPI · Gemini API · SendGrid

Resume Builder — FastAPI Backend

LOCAL PROJECT

Backend API for dynamically generating and managing resumes with PDF export support and structured data storage.

FastAPI · Python · SQLite · PDF generation

Production Websites — WordPress & Shopify (7+ Sites)

INTERNSHIP — LIVE

Designed and deployed 7+ client-facing production websites across gaming, trade, jewellery, wellness, and design industries.

yologaming.in · ittusa.in · dancedesign.in · wmarkglobal.com · justlovefinejewellery.com

WordPress · Shopify · CSS · Client delivery

IOT & HARDWARE PROJECTS

Human Following Robot IOT

ACADEMIC PROJECT

Autonomous robot that detects and follows a human using ultrasonic and infrared sensors. The robot tracks movement in real time, adjusting motor direction and speed based on sensor input. Programmed using Arduino with distance-based logic for smooth navigation.

Arduino | Ultrasonic Sensor | IR Sensor | DC Motors | Motor Driver (L298N)

Smart Blind Stick IOT

ACADEMIC PROJECT

Assistive device for visually impaired individuals that detects obstacles in the path using an ultrasonic sensor and alerts the user via vibration motor and buzzer. Designed for ease of use with a compact Arduino-based circuit embedded in a walking stick.

Arduino | Ultrasonic Sensor | Vibration Motor | Buzzer | Embedded Systems

Digital Door Lock System IOT

ACADEMIC PROJECT

Keypad-based electronic lock system where a user-defined PIN controls a servo motor to lock/unlock the door. Includes incorrect attempt detection with alarm trigger and LCD display for user feedback. Built using Arduino Uno.

Arduino | 4×4 Keypad | Servo Motor | LCD Display | Buzzer

EDUCATION

BCA — Bachelor of Computer Applications
Shri M.D Shah Mahila College, Adarsh Education Society
Graduation year — 2026

HSC (12th)
Maharashtra State Board
60.67%

SSC (10th)
Maharashtra State Board
71.40%

KEY ACHIEVEMENTS

- Deployed 7+ live production websites for real clients across gaming, trade, jewellery, and wellness industries
- Built audit compliance PDF Q&A tool using Gemini API + Sentence Transformers with page-level answer extraction
- Automated CAPTCHA reading on secured government portals (IIB, IRDAI) using OCR — complex real-world integration
- Independently built SprintCart, Care4Skin, and Resume Builder from scratch — end-to-end full-stack
- Integrated Gemini, SendGrid, and ScrapingDog APIs across multiple production and intern-level projects
- Designed and built 3 IoT hardware projects — Human Following Robot, Smart Blind Stick, and Digital Door Lock — demonstrating embedded systems and sensor integration skills
